Production metrics

- All five issues were published to schedule, including our special issue on *Improving Inflation and Related Performance Measures for Nations*, guest edited by Robert J. Hill and Alice O. Nakamura.
- All articles benefited from our fast tracking *EarlyView* service which reduces the time to publication for our authors.
- Corresponding authors from 19 countries were published in Volume 56, with authors from the United States made up the most significant proportion, with 15% of articles.
